

REMARKS

Amendments to the Abstract

The examiner has objected to the Abstract of the Disclosure citing its failure to comply with the requirements of MPEP §608.01(b).

Applicants herewith submit a substitute Abstract in marked and clean copy format to overcome the Examiner's objection. No new matter has been introduced by way of this amendment.

Rejections under 35 U.S.C. §102(b)

Claims 1, 2, 4-30, 32, 33, 35 and 37-66 are pending. Claims 3, 31, 34 and 36 are cancelled. Claims 1, 2, 4-30, 32, 33, 35 and 37-66 have been rejected under 35 U.S.C. §102(b) as being anticipated by EPO application 02077219.0, filed June 7, 2002 (the "EPO application") on the grounds that the corresponding PCT/EP03/06120 application (the "PCT application") was filed more than one year after the filing date of the EPO application.

The PCT application claims priority to the EPO application and the present application claims priority to both. Although not explicitly stated by the Examiner, it is assumed that the rejection is based on the actual publication of the EPO application and the presumption that applicant cannot rely on its priority claims and that the effective filing date of the application is therefore December 15, 2005.

However, the Applicant is entitled to claim priority to the PCT and EPO applications because the PCT application was timely filed in the PCT Receiving Office of the EPO. The EPO application was filed on June 7, 2002. The PCT application should have been filed by June 7, 2003. However, that date fell on a Saturday so the PCT application could have been filed on June 9. However, June 9, 2003 was a holiday in Europe. The Examiner's attention is directed to official calendar of the European Patent Office in 2003 (page 13, line 7 of the table). A copy of the EPO Official Calendar for 2003 is attached hereto in support of Applicant's argument. The national holiday called Whit Monday was June 9, 2003. Accordingly, no application could be

filed before the next working day, i.e. June 10 2003. Whit Monday is a recognized holiday throughout Europe.

Applicants timely filed the PCT application on June 10, 2003. The application's priority claim to the PCT and EPO applications is therefore correct. This being the case, the EPO application cannot be used as prior art against the claims. Applicant respectfully requests the withdrawal of the Examiner's Rejection of the claims under 35 U.S.C. §102(b).

Further to the Examiner's comment on the patentability of the claims under 35 USC §103(c), the subject matter of all of the claims was commonly owned by the same entity or under an obligation of assignment to the same entity at the time the inventions were made.

Applicant believes the claims are in a condition for allowance. Early notification thereof is respectfully requested.

While no additional fee is believed to be due, if this belief is in error the Commissioner is authorized to charge any additional fees, including extension fees or other relief which may be required, or credit any overpayment to Deposit Account No. 50-0310 (Our Order No. 067670-5004-US).

If there are any questions with regard to the foregoing, please call applicant's attorney at 415-442-1000.

--ABSTRACT

The present invention relates to novel compounds for modulating the activity of exchange proteins directly activated by cAMP (Epacs). In particular, the present invention relates to cAMP analogues that specifically modulate the activity of Epacs. Examples of the compounds of the invention are substituted deoxyadenosine-cyclic monophosphates.

The invention further relates to pharmaceutical compositions comprising the novel compounds, and the use of the compounds in the treatment of diseases like cancer, chronic inflammation, thrombosis and/or type-2 diabetes mellitus in humans and/or animals.--
